PETtrac Data Verification

Keeping your information updated allows us to contact you as soon as your lost pet is found. Your pet has been registered in PETtrac, the 24/7 pet recovery service, since we received your initial information. In order to provide this protection for your pet, it's our policy to have your initial information scanned into our system within 24 hours of receipt.

We realize that families move to new homes so we are following up with this verification to make sure your records are correct and up to date. Please verify your information and if corrections are necessary please return it by mail or fax. Keep this form for your records if no changes are required.

Please contact Avid as soon as possible should your current information change. A processing fee of \$6.00 is required for change of information. If your pet has a change in ownership, a new registration is required for the new pet parent which costs \$19.95. There is no fee for correcting typographical errors.
